

# ARRYA A

Frontend Developer | React.js | Full-Stack (MERN Fundamentals)

Coimbatore, India | arrya98@gmail.com | +91 9443046717 | [LinkedIn](#) | [Portfolio](#) | [Github](#)

## PROFESSIONAL SUMMARY

---

Frontend Developer with 2+ years of experience building responsive, scalable web applications using React.js. Skilled in reusable UI development, API integration and translating designs into production-ready interfaces. Fundamental knowledge of the MERN stack (Node.js, Express.js, MongoDB) gained through internship and hands-on project. Open to Frontend, Backend and Full-Stack Developer roles.

## TECHNICAL SKILLS

---

**Frontend Development:** React.js, JavaScript (ES6+), Responsive design, CSS3, HTML5, Tailwind CSS, Material UI, Bootstrap, Props and state, Reusable component design.

**Backend & Database:** Node.js, Express.js, MongoDB, MySQL.

**Tools & Practices:** GitHub, Code reviews, Vite, Cross-browser compatibility, Axios, Figma-to-Code, Claude.

## PROFESSIONAL EXPERIENCE

---

### React Developer — Bpract Software Solutions

May 2025 – Present

- Developed and maintained React.js web applications for MLM and e-commerce platforms.
- Built reusable React components and integrated REST APIs for forms, dashboards and charts.
- Developed modules for subscriptions, maintenance and user management to support core business workflows.
- Implemented feature enhancements and resolved bugs in live production applications, improving performance.

### ReactJS Developer — Freelance, White Matrix Software Solutions

Nov 2024 – Jan 2025

- Developed the frontend of **KSRTC's Fleet Management System** using React.js with responsive, reusable components.
- Converted Figma designs into pixel-accurate, responsive interfaces.
- Built modules for Admin, Vehicle, Driver/Conductor, Trip Management and Analytics.
- Integrated REST APIs using Axios and developed data tables with search, filtering and pagination.
- Collaborated with the backend team (Node.js, Express.js, MongoDB) in an Agile environment using Git.

## INTERNSHIP & TRAINING EXPERIENCE

---

### MERN Stack Developer Intern — Luminar Technohub, Kochi

Oct 2024 – Apr 2025

- Built full-stack CRUD applications using MongoDB, Express.js, React.js and Node.js (MERN stack).
- Gained hands-on fundamentals in REST API design, state management and database integration.
- Applied MERN stack concepts to project-based assignments simulating real-world use cases.

### MERN Full Stack Training — Luminar Technolab, Kochi

Mar 2024 – Sep 2024

- Completed an intensive full-stack training program covering MongoDB, Express.js, React.js and Node.js.
- Built hands-on projects applying REST API design, component architecture and state management concepts.
- Strengthened frontend fundamentals in JavaScript (ES6+), React hooks and responsive UI development.

### .NET Developer Intern — Cognizant Technology Solutions, Coimbatore

Dec 2019 – Apr 2020

- Completed training and internship focused on .NET development.
- Gained exposure to C#, .NET fundamentals and software development practices.
- Worked on basic development tasks as part of the internship program.

## PROJECTS

---

### • GadgetHub

React-based application that enables users to browse, add, update and manage products efficiently. Users can view product details and perform CRUD operations seamlessly.

- **Cook Book**

CookBook is a dynamic recipe listing application built using React and Redux for efficient state management. The app allows users to browse a wide range of recipes featuring pagination, cuisine-based search and detailed recipe views.

- **Project Fair**

A project showcase platform that enables users to register, log in securely and explore projects from all users in a shared dashboard. Logged-in users can manage their own projects, including creating, updating and deleting them.

- **Safety Klik – Wearable device for women safety**

This project consists of a wearable device for women's safety, it consists of sensory device that, when tapped, alerts parents and provides them with the victim's location and a message for assistance. Thus, parents can take safety measures by keeping track of the victim using GPS.

- **Smart Crop Protection**

This project consists of an image processing technique to detect wild animals and ward them off without human intervention using automatic animal-repellent buzzers. It produces an animal-repellent sound and sends the alert message to the farmers when an animal is detected.

- **Smart Parking Assistant**

This project provides an effective solution to avoid crashes and confusion during car parking in an unorganized and unknown parking areas, ensuring efficient parking assistance for economical cars (i.e. cars without an automatic parking system).

## **EDUCATION**

---

### **Bachelor of Engineering, Computer Science and Engineering**

*2016 – 2020*

Sri Ramakrishna Engineering College, Coimbatore

CGPA: 8.32/10

## **CERTIFICATIONS**

---

- MEAN/MERN Full Stack — NACTET
- Introduction to Operating Systems — NPTEL, IIT Madras
- Social Networks — NPTEL, IIT Madras
